## **FACILITIES OPERATIONS UPDATE (Week of September 7<sup>th</sup> to September 13<sup>th</sup>, 2014)**

***(Important WUSM coordinative communication. Please share by email.)***

---

**To:** Key Stakeholders  
**CC:** Facilities Management

### **This week's topics include:**

- **Duncan/Boyle Intersection Closure & Red Shuttle Update**
  - **ALERTUS Testing**
  - **818 Parking Lot Restricted on September 12<sup>th</sup>**
- 

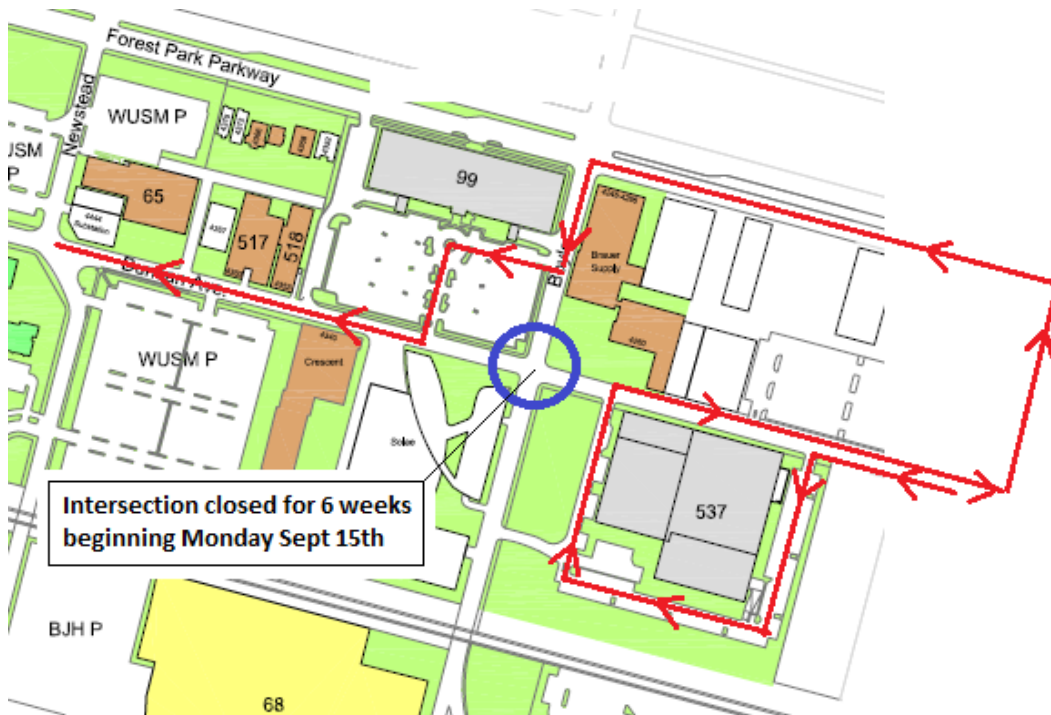

# **Duncan/Boyle Intersection Closure & Red Shuttle Update**

## **From: BJC Planning, Design, and Construction**

The Metropolitan Sewer District's (MSD) project to upgrade the storm sewer in Duncan Avenue will require the closure of the intersection of Duncan and Boyle for approximately six weeks starting at 5 am on Monday, September 15<sup>th</sup>. Employees who access campus parking through the intersection should plan to take alternate routes, such as Clayton and Forest Park Avenues to Newstead or Taylor.

The red shuttle route will be affected. Service to @4240 will be maintained. The west entrance/exit on Duncan at the @4240 building, which is currently closed, will be open on Monday, September 15<sup>th</sup>. The red route buses will enter @4240 via the east entrance (from Sarah/Duncan), pick-up/drop-off at the current shuttle stop, then proceed around the building and use the west entrance/exit to exit on Duncan.

Departing @4240, the red route will travel eastbound on Duncan to Sarah to Forest Park to Boyle in route to the Cortex building, followed by shuttle stops at 4444 and Goldfarb before returning to the Depot. This new route of travel from @4240 to Cortex will add an additional 3-4 minutes to the red route for a total round trip time of approximately 13 minutes. See below for a map.

The MSD project, which began in March, has encountered significant delays. Duncan has been a utility highway for more than a century. It is packed with old and new sewer pipes, conduits, gas lines, fiber optic cables and more. Adding a five- to six-foot diameter storm water sewer has posed numerous challenges. The red circle on the map below is the area mentioned. Please see attached for additional information.

# ALERTUS Testing

**From: Ty Davisson, Director of Emergency Management**

Fire alarm systems in speaker-equipped buildings on the Medical School campus were recently outfitted with ALERTUS emergency notification modules to allow for an emergency voice message with safety instructions to be broadcast through the current fire alarm system in the event of a serious University-wide emergency (such as a tornado warning or active shooter on campus).

As a part of this installation, a significant number of campus buildings' fire alarm systems will undergo a period of testing to ensure proper system operation. There is **NO NEED OR EXPECTATION FOR EVACUATION OR ANY OTHER ACTION TO BE TAKEN** by the campus community during these tests.

Please visit <http://facilities.med.wustl.edu/2014/08/alertus-testing/> for detailed information about the testing and what you can expect.

The following is the anticipated schedule for each building to be tested. Notices will also be posted in main entrances of each building 3-4 days prior to testing.

September 18, 2014	September 19, 2014	October 2, 2014	October 3, 2014
North Tower Addition	West Building	4480 Clayton	SRF East
Clinical Science Research Building	Irene Walter Johnson Institute of Rehab	4488 Forest Park	Becker Medical Library
Wohl Clinic	Maternity	BJCIH	Farrell Learning and Teaching Center
Wohl Hospital	McMillian	Northwest Tower	McDonnell Science
Barnard Hospital	East McDonnell		Olin Hall
Mallinckrodt Institute of Radiology			
Renard

## 818 Parking Lot Restricted on September 12<sup>th</sup>

**From: Marc Hudson, Assistant Manager of Investigations – Protective Services**

Due to the WUSM Employee Appreciation Picnic on Friday, September 12<sup>th</sup>, unreserved surface parking on the 818 parking lot will be restricted on Friday, September 12<sup>th</sup>. See below for a map of the lot.
