1.01 – INTRODUCTION AND FOREWORD

PART 1 – GENERAL
This document contains the WUSM Standards and Specifications for Maintenance and construction in WUSM facilities, and is an integral component of the Design Guidelines.

PART 2 – PRODUCTS
The Standards and Specifications are divided into divisions which have been prepared by WUSM Design and Construction and other campus departments that have standards relating to design or construction. See the Table of Contents for a detail listing of the information included.

PART 3 – EXECUTION
This document is to be used by Consultants and University Staff for all maintenance and construction projects. Exceptions to the standards and specifications may be submitted in writing to the WUSM Design and Construction Office.

This publication has been prepared for the guidance of Consultants providing architectural and engineering services under contract to Washington University School of Medicine through the Design and Construction Office. While Washington University Contracting Office constitutes the obligating office for the University, the Construction Office will only close an obligation if certified as complete by the WUSM Design and Construction Division of the Facility Management Department.
