TO: MEDICAL SCHOOL CAMPUS COMMUNITY

RE: SECURITY REMINDER – PROTECTIVE SERVICES

The security of any facility, including the Medical School Campus, is dependent upon a close collaboration between all members of the medical school community and those who are tasked with protecting it. Here are some suggestions that may assist in that effort.

- Wear your university/hospital ID in an easily visible location at all times while within the complex – this helps everyone identify you as a member of the School community.
- Take note of any suspicious activity and call Protective Services as soon as you are able to safely do so @ 362-HELP(4357). We’d rather hear from you over a minor misunderstanding than not hear from you about a security issue.
- Always be alert to your surroundings.
- Be aware of those in your work area that do not appear to belong.
- Note and report doors, locks and lighting that do not appear to be functioning properly.
- Holding open locked doors for others is a nice gesture, unless they really don’t belong in the area.
- Propping open doors may be a safety concern.

HELP US HELP YOU! SECURITY MATTERS!
