SECTION 06 20 00 – FINISH CARPENTRY

PART 1 – GENERAL

PART 2 – PRODUCTS

Wood paneling, and running and standing trim shall be permitted only by exception.

Stained or clear finished paneling on standing and running trim shall be plain or quarter sawn red oak.

Exotic species of wood shall be considered on a case-by-case basis. Buildings with established standard other than red oak shall remain the building standard.

Less expensive hardwoods shall be used at painted or concealed locations.

All woodwork shall comply with AWI premium grade standards.

Wood paneling and trim shall be shop finished so as to require only minimal touch up in field.

Reference casework and millwork Section 06 40 23. All materials, adhesives and sealants shall be in compliance with low VOC emission requirements of LEED NC. Refer to Sustainable Design Requirements Section 01 81 13.

PART 3 – EXECUTION
