SECTION 06 40 23 – INTERIOR ARCHITECTURAL WOODWORK

PART 1 – GENERAL

PART 2 – PRODUCTS

Casework for coffee areas, copier areas, and other non-medical or laboratory areas shall be plastic laminate base and wall cabinets and plastic laminate countertops unless otherwise noted.

Toilet room lavatory tops, backsplashes and sidesplashes shall be solid surfacing material.

Wood casework in laboratories and surgeries shall be allowed by exception only. Refer to Section 12352 Laboratory Casework.

All work shall comply with AWI premium grade standards.

Substrates shall contain no formaldehyde. MDF and plywood are acceptable substrates. Particleboard is not an acceptable substrate. Provide hardwood faced waterproof plywood at all wet locations.

Solid surfacing shall be Corian or approved equal.

Plastic veneer shall be general purpose typed, Grade GP-50, nominal 0.050” thick.

Reference Section 06 010. All materials, adhesive and sealants must be in compliance with Sustainable Design Requirements Section 01 81 13.

PART 3 – EXECUTION
