SECTION 10 26 00 – CORNER AND WALL GUARDS

PART ONE – GENERAL

Provide corner guards in public areas, maintenance areas, housekeeping areas and service areas subject to impact by cart traffic.

Provide corridor wall guards in animal quarter areas and service areas subject to damage by carts and cage racks.

PART TWO – PRODUCTS

Corner guards in public areas shall be vinyl, surface mounted, with a three (3) inch face width as manufactured by Construction Specialties, Inc., Acrovyn or equal. Height shall be 48” minimum and set on top of the wall base. Recessed corner guards shall be by exception only and must be approved by the WUSM project manager.

Corner guards at service areas, housekeeping areas and animal quarters shall be surface mounted stainless steel, 18-gauge, satin finish with a face width of 3”. Height shall be 48” minimum and set on top of the base. Full height corner guards shall be provided at animal quarters to maximize protection from rolling carts and equipment.

PART 3 – EXECUTION

Mechanically secure aluminum retainers for all vinyl corner guards to wall substrate. Adjust end and top trim caps as required to ensure tight seams.

Secure stainless steel corner guards to wall surface with double sided adhesive strips to withstand imposed loads.
