Green Space and Food Truck Parking
A few weeks ago, the Facilities Management Department announced the opening of new green space and a new dedicated food truck location starting on Monday, January 4th. The food trucks will be located in front of the new green space near the corner of Scott and Taylor Avenues.

Features of this new space will be an outdoor seating area, dedicated space for five food trucks and reduced noise through decreased generator use.

On Monday, December 21st, we distributed a handout telling the food trucks of the coming change and referring them to the St. Louis Food Truck Association for more information.

If you have any questions, please contact Brent Ray at 314-362-2371 or rayb@wusm.wustl.edu.

Shell Cafe - Updated Information About Renovations

The Shell Café is still closed for renovations and will re-open on Monday, January 4th. We are renovating the space to provide an updated and more comfortable experience for you! See the flyer and board for more information.

As part of the renovations, we will be replacing the seating and flooring as well as adding additional seating. Due to the amount of new chairs being ordered, it’s possible we may have replacement chairs when the Café opens on January 4th but this is only temporary until all of the new chairs come in.

While the Shell Café is closed, the FLTC Café will have holiday hours from 6:30am to 3pm. We apologize for the inconvenience during construction but we are excited to be
able to provide a much more pleasant dining experience for you when the Café reopens!

**BJCIH Temporary Exterior Access**

As part of the BCJIH Commercial Kitchen Project, the construction management team, Tarlton, will install temporary access on the south side of BJCIH. The access is from the south alley, east of the storage tanks and west of the bike parking (see the attached sketch). They will remove the existing fence in this area, leaving both the tank storage and bike parking secured and will remove and salvage the brick from the building in order to install a set of 4 foot wide doors, making an 8 foot temporary opening.

At this location, the first floor is at a higher elevation than the south alley so a small dock would be constructed. The dock would be located under the existing overhang and would not protrude into the south alley. Access by WUSM and BJC would continue to be through the BJCIH Central Stair.

Construction of the proposed temporary access would begin in January 2016. This area would be used strictly for loading and unloading of materials. Upon completion, roughly 12 months after beginning construction, the temporary access would be removed and restored to the current state. The salvaged bricks would be reinstalled, matching the surrounding brick.
